- Python is an object-oriented programming language created by Guido Rossum in 1989.

Features Of Python

- **Easy-to-learn**
- **Easy-to-read**
- **Easy-to-maintain**
- **Free and open-source**
- **Portable**
- **Extensible and Embeddable**
- **Object-oriented**

Who uses python:

- Python is used by many large organization like Google, NASA, Quora, HortonWorks and many others.

Where python is used?

- GUI application.
- Create Websites.
- Scrape data from website.
- Analyse Data.
- System Administration Task.
- Game Development.

Getting start with python

- To download and install Python visit the official website of Python <http://www.python.org/downloads/>
- Once the download is complete, run the exe for install Python. Now click on Install Now.
- When it finishes, you can see a screen that says the Setup was successful. Now click on "Close".

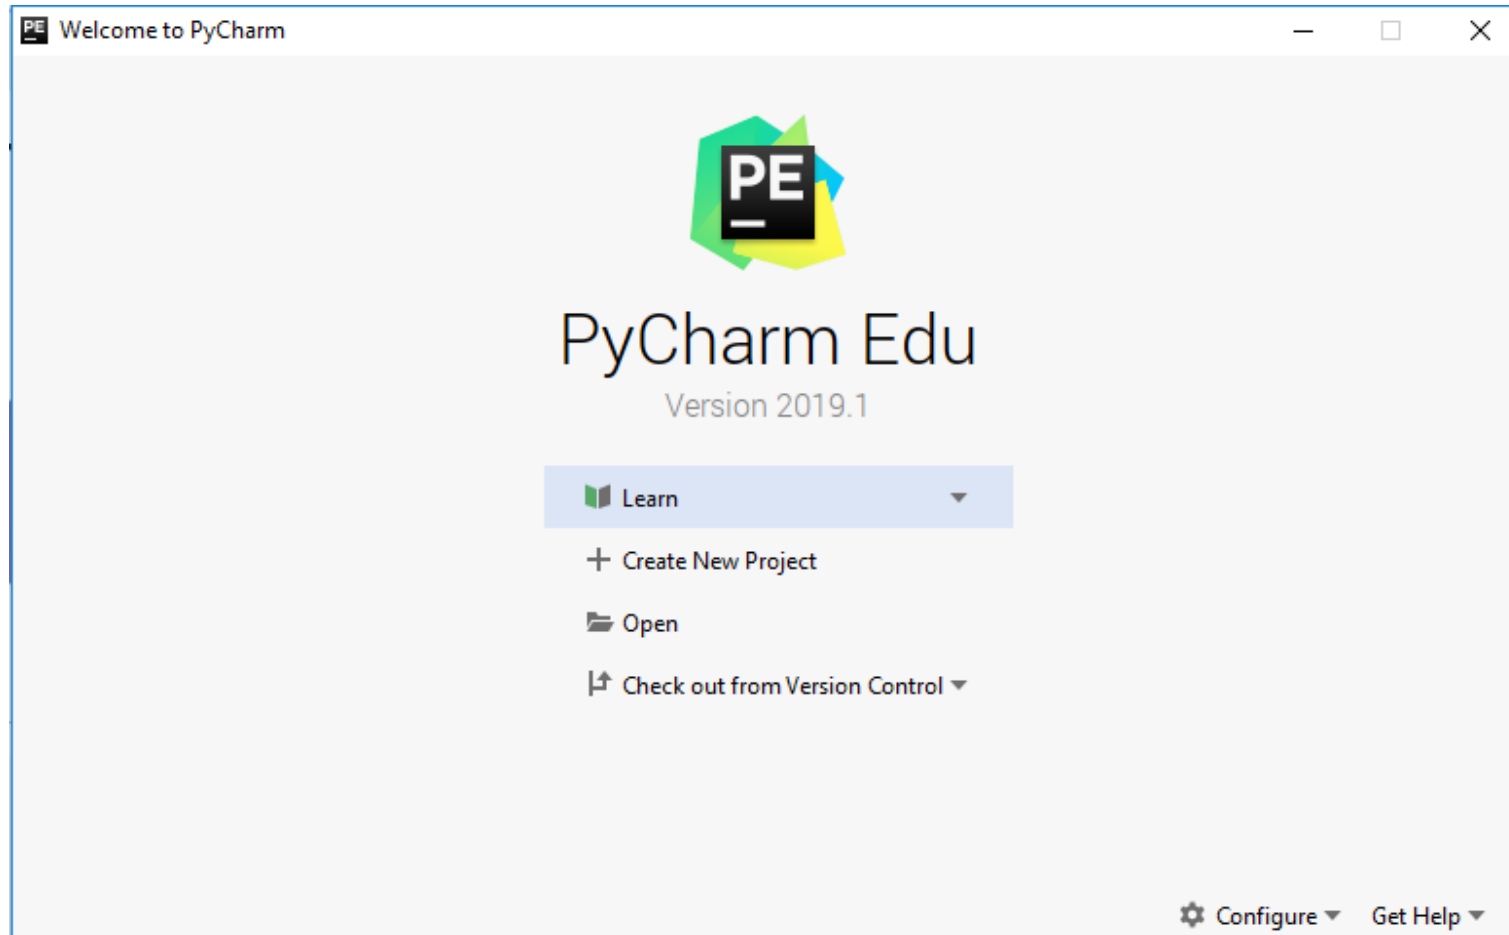

Installing Pycharm

- To download PyCharm visit the website <https://www.jetbrains.com/pycharm/download/> and Click the "DOWNLOAD" link under the Community Section.
- Once the download is complete, run the exe for install PyCharm. The setup wizard should have started. Click "Next".
- On the next screen, Change the installation path if required. Click "Next".
- On the next screen, you can create a desktop shortcut if you want and click on "Next".

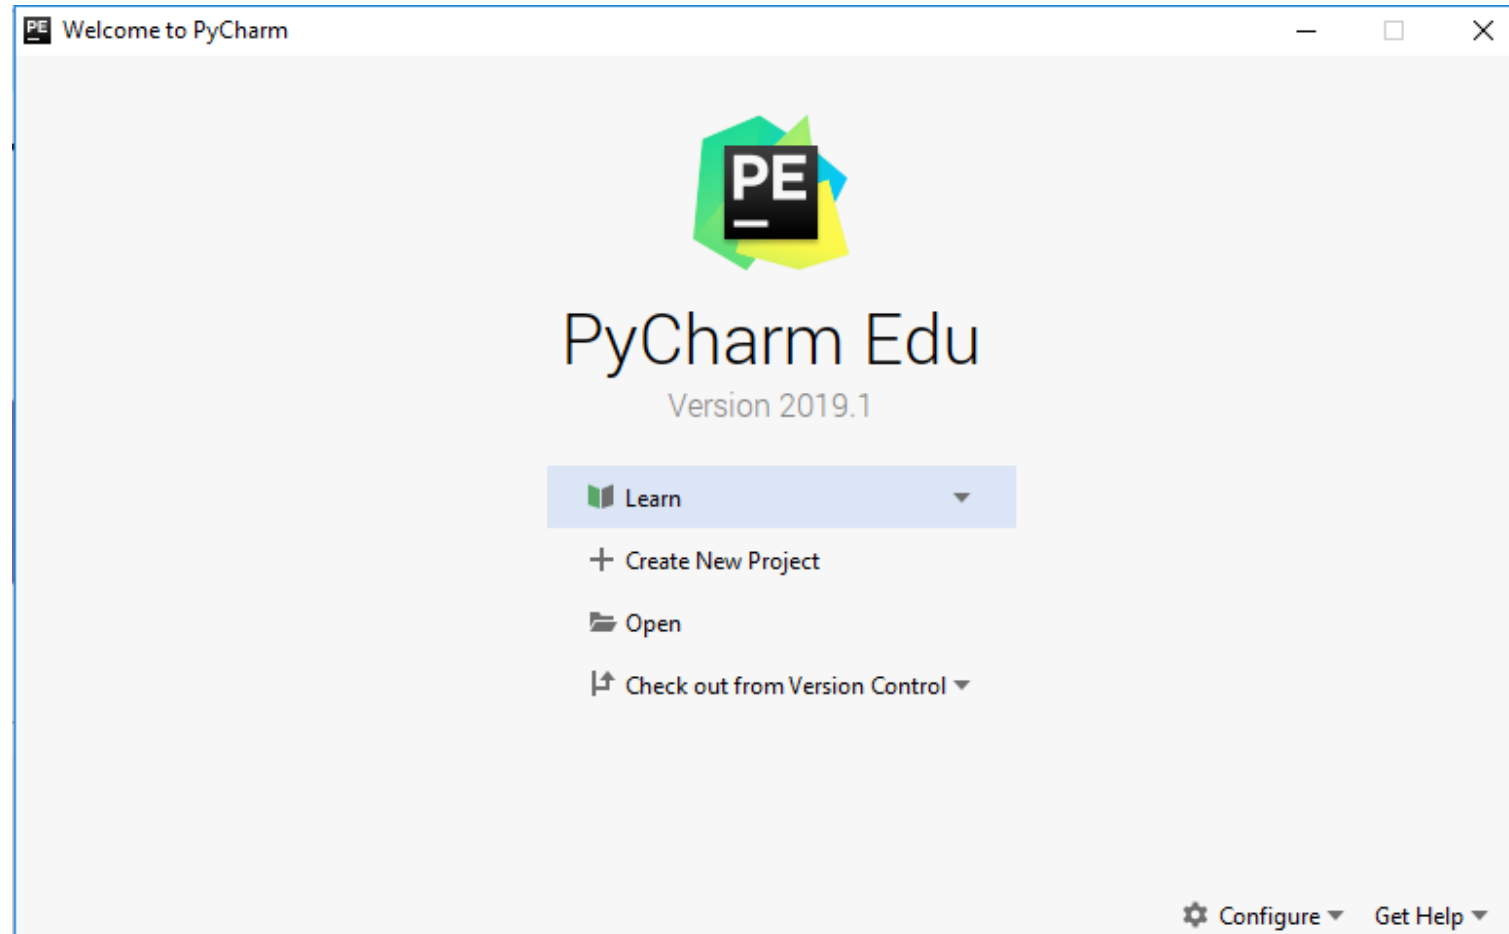

- Choose the start menu folder. Keep selected JetBrains and click on “Install”.
- Wait for the installation to finish.
- Once installation finished, you should receive a message screen that PyCharm is installed. If you want to go ahead and run it, click the “Run PyCharm Community Edition” box first and click “Finish”.
- After you click on "Finish," the Following screen will appear.

HelloWorld in Python

PE New Project

Location: D:\demo

▼ Project Interpreter: New Virtualenv environment

☒ New environment using Virtualenv

Location: D:\demo\venv

Base interpreter: C:\Users\Devanshi\AppData\Local\Programs\Python\Python37\python.exe

☐ Inherit global site-packages

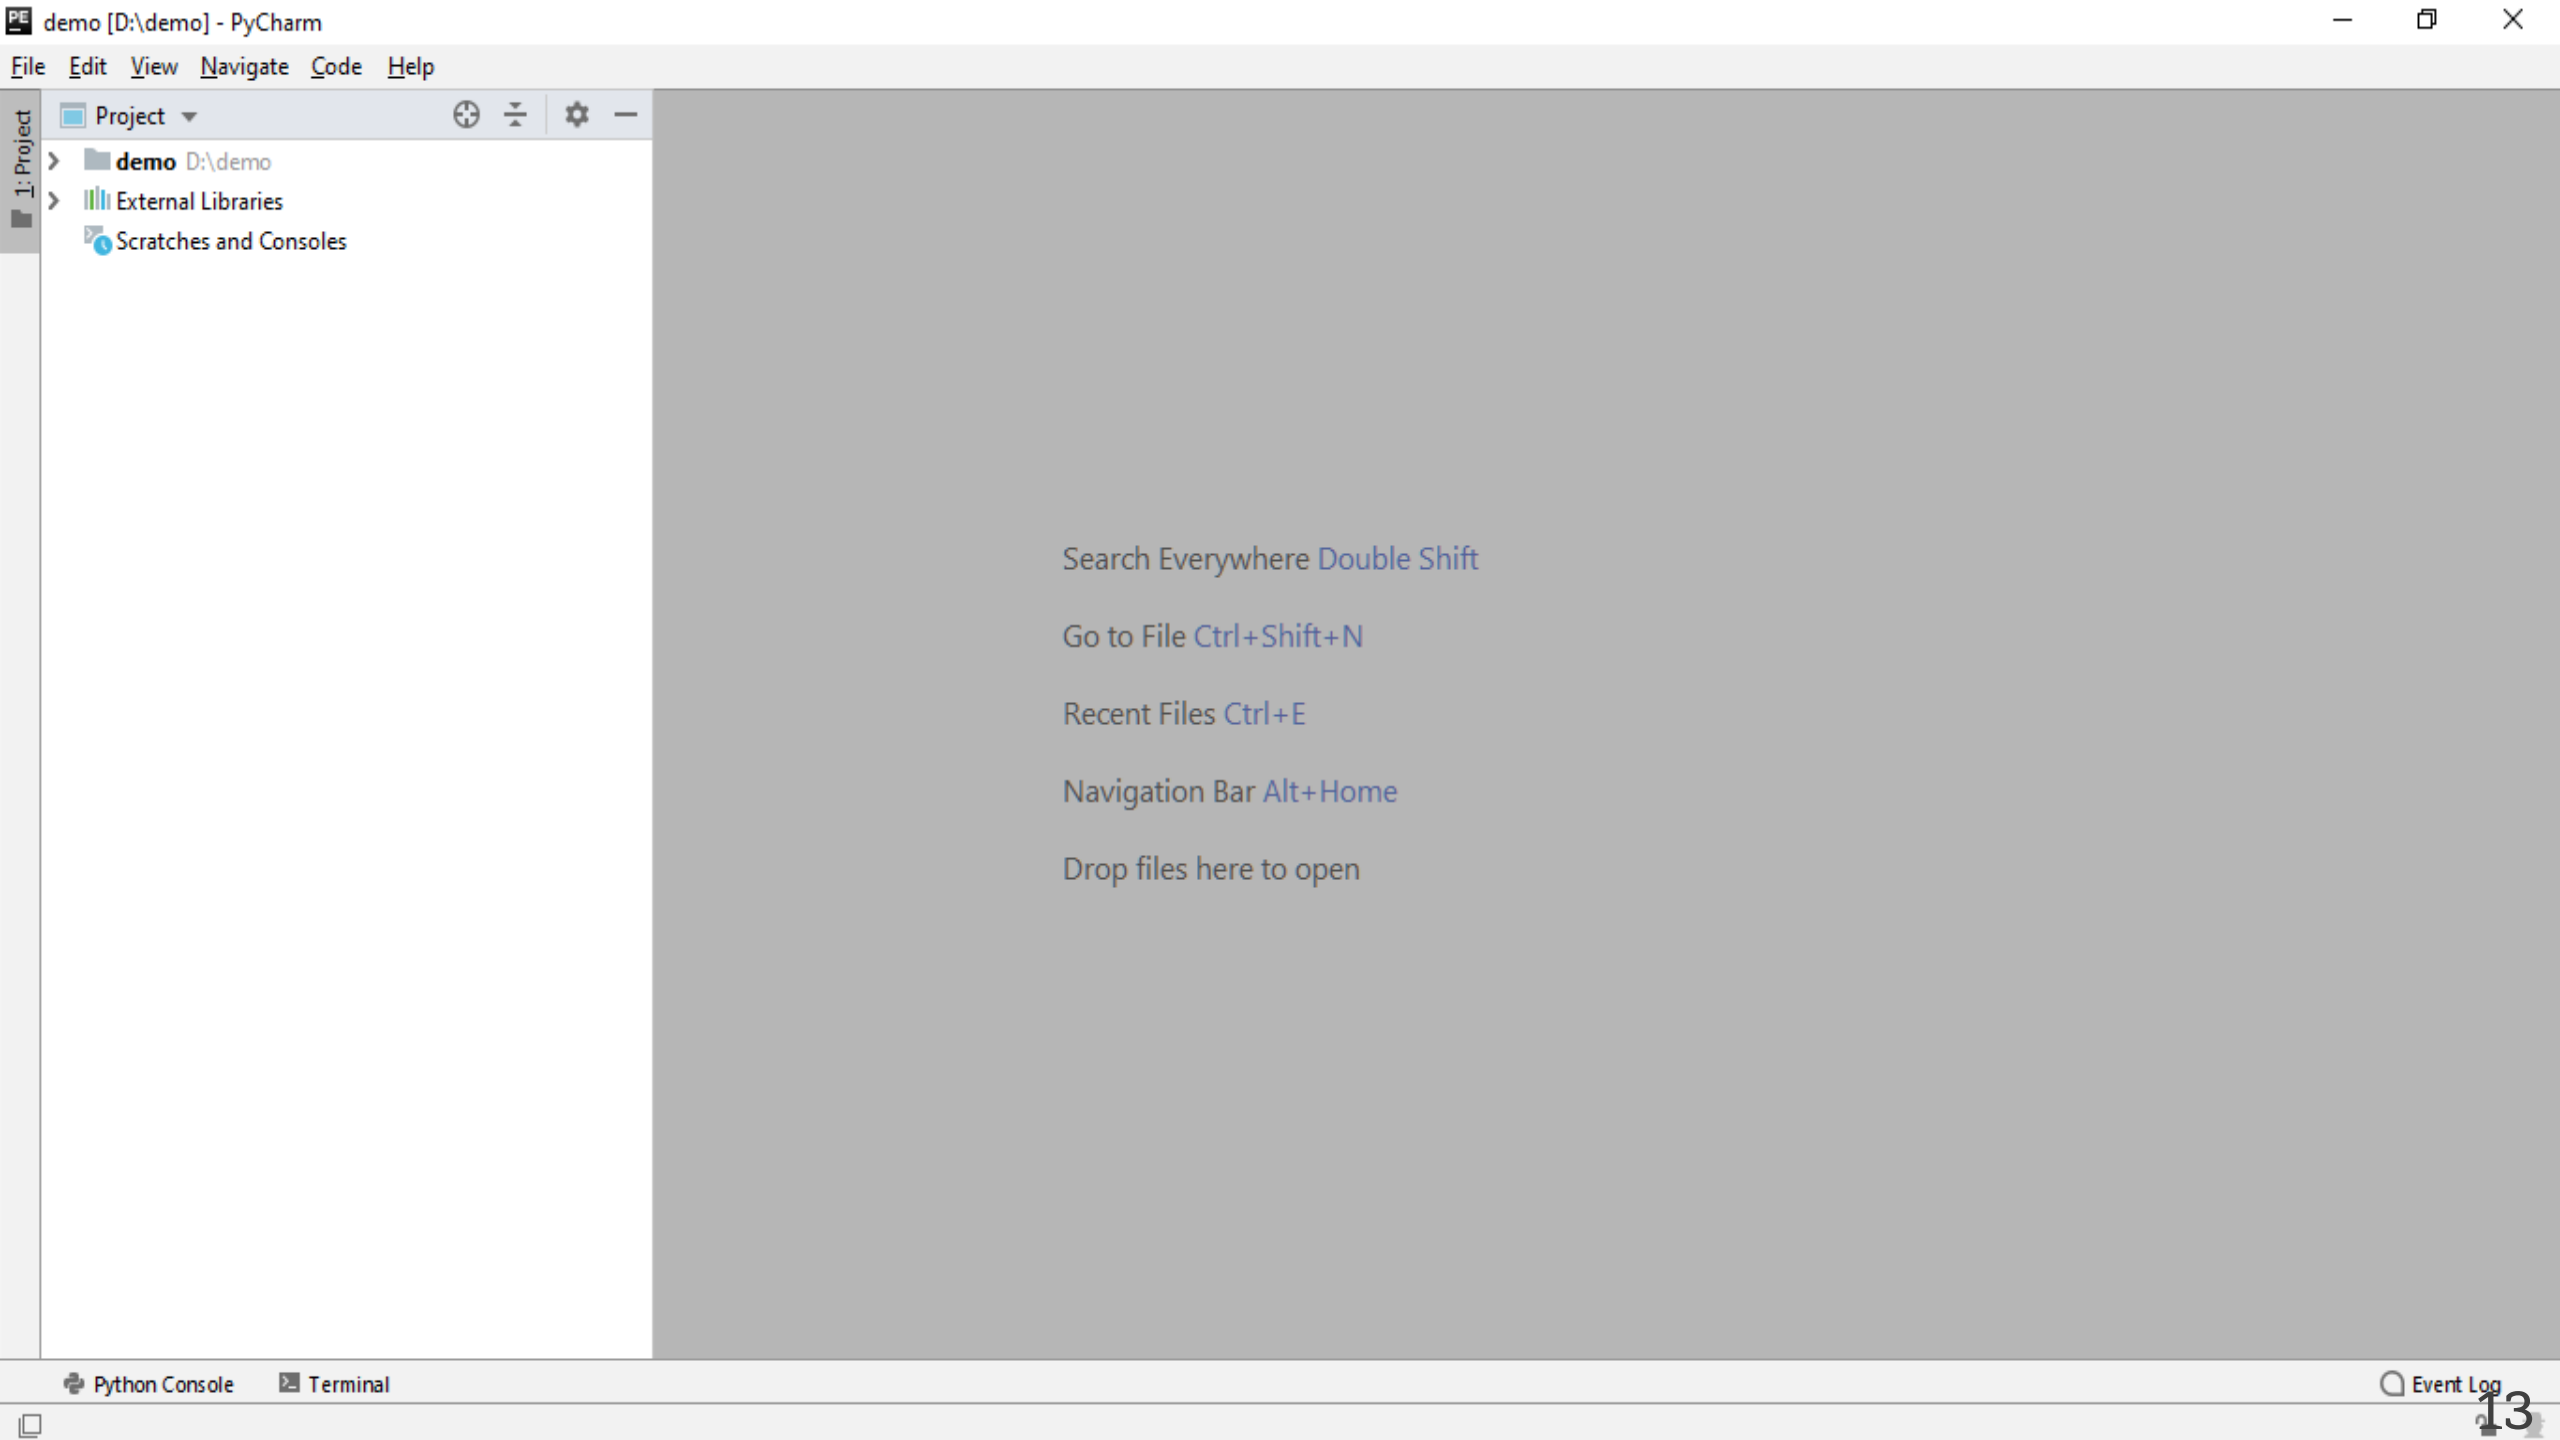

☐ Make available to all projects

☐ Existing interpreter

Interpreter: <No interpreter>

```
File Edit View Navigate Code Help
scratch.py x
1: Project
1 print("Hello World!!!")
2
```

The screenshot shows a Python IDE window with a menu bar (File, Edit, View, Navigate, Code, Help) and a tab for 'scratch.py'. The code editor contains a single line of Python code: `print("Hello World!!!")` on line 1. Line 3 is highlighted in yellow. Below the editor is a 'Run' panel with a tab for 'scratch'. It shows the output 'Hello World!!!' and the message 'Process finished with exit code 0'. The Run panel also includes a vertical toolbar with icons for running, stepping through, and other debugging actions.

```
File Edit View Navigate Code Help
scratch.py x
1 print("Hello World!!!")
2
3
4

Run: scratch x
Hello World!!!

Process finished with exit code 0
```
